DEVOPS ENGINEER

DevOps Engineer with 7+ years of experience architecting, automating, and scaling cloud-native platforms across multi-account AWS environments. Specialized in Kubernetes, IaC, GitOps, CI/CD automation, platform engineering, and secure cloud architecture. Proven ability to modernize infrastructure, build internal developer platforms, lead cross-functional initiatives, and implement AI-powered automation tools. Strong mentor and technical lead with a track record of improving deployment speed, developer productivity, reliability, and governance.

WORK EXPERIENCE

Philips 11/2024 – Present DevOps Engineer Bangalore

- Contributing to the Cloud Center of Excellence to drive secure, scalable, and cost-efficient cloud practices.
- Built and maintained Terraform modules for shared services across multi-account environments.
- Architected and operated multi-cluster Amazon EKS platforms including upgrades, patching, and observability.
- Migrated Helm and addon workflows from manual/Flux to Argo CD GitOps, achieving 30% faster deployments.
- Implemented Inspector-driven CVE remediation using custom SSM documents, Patch Manager
- Designed cross-account AWS architectures using Private CA, Backup, and RAM.
- Authored cloud/Kubernetes playbooks and mentored an 5-member engineering team.
- Designed optimized CI/CD pipelines in GitHub Actions
- Maintain AWS CDK and AWS SAM based IAC repositories

Envestnet Inc 11/2022 – 11/2024 Lead Engineer – DevOps Trivandrum

- Modernized Terraform IaC, reducing drift and improving global environment stability.
- Designed optimized CI/CD pipelines in GitLab CI.
- Built scalable AWS infrastructure aligned with compliance requirements.
- Implemented GitOps processes, reducing deployment time by 50%.
- Mentored junior engineers and reduced onboarding time by 40%.
- Developed Helm charts and deployment manifests for Spring Boot apps.
- Enhanced observability by closing monitoring and logging gaps.

Goodbits Tech Pvt Ltd (Simelabs) 11/2020 – 10/2022 DevOps Engineer Infopark, Kochi

- Built and scaled AWS IaC using Terraform across multiple environments.
- Developed automated CI/CD pipelines and mobile app deployments via Fastlane.
- Managed ECS-based deployments improving speed and scalability.
- Reduced AWS costs through optimization and resource cleanup.

CMS Software and Networks 04/2018 – 10/2020 Systems Engineer Thrissur

- Designed and maintained AWS infrastructure for production workloads.
- Provided L2/L3 support and implemented patching, backups, and scaling strategies.

Aron Labz
System Support Engineer

06/2016 – 03/2018
Thrissur

- Performed troubleshooting, user support, and system maintenance.
- Created documentation and improved operational workflows.
- Integrated embedded devices with PC systems, improving data communication efficiency and system performance.

EDUCATION

B.Tech in Electrical & Electronics Engineering

Thejus Engineering College – University of Calicut

Thrissur • 05/2012 – 05/2016

- Developed innovative projects during the degree program
- Participated in technical competitions and workshops

PG Diploma in Industrial Automation

Keltron, Thrissur

Thrissur

- Completed specialized training in industrial automation
- Applied automation concepts in real-world projects

CERTIFICATIONS

Terraform Associate (003)

08/2024 – 08/2026

HashiCorp

Certified: Azure Administrator Associate

09/2020 – 09/2022

Microsoft

Certified Trainer

09/2020 – 09/2021

Microsoft

PROJECTS

Internal Release Tool Platform

- Developed a Release Automation Dashboard using Streamlit (UI) + FastAPI (backend). Integrated GitHub Actions for semantic versioning, tagging, and EKS deployments. Built a custom MCP server enabling AI-assisted release workflows via GitHub Copilot. Improved release reliability, traceability, and developer efficiency.
- Developed a user-friendly Release Automation Dashboard for efficient deployment processes.
- Implemented AI-assisted release workflows to enhance developer productivity.

DevOps Log Analyzer

- Built a privacy-first log analysis tool using Ollama, Streamlit, and local LLMs for troubleshooting CI/CD and infrastructure issues. Published on Medium.
- Developed a privacy-focused log analysis tool for improved troubleshooting capabilities.
- Published the project on Medium to share insights with the community.

AI Project Management Co-Pilot (MCP Server)

- Designed and developed an MCP-powered assistant using Claude. Automated Confluence documents, Jira epics/user stories via Atlassian MCP, and GitHub documentation/repo scaffolding using GitHub MCP. Published on Medium.
- Created an AI-powered assistant to automate project management tasks.
- Published the project on Medium to showcase the automation capabilities.

SKILLS

AWS: Backup, CloudFront, CloudWatch, DynamoDB, EC2, ECS, EKS, IAM, Inspector CVE remediation, Lambda, RDS, S3, SNS, SQS, VPC

Infrastructure as Code: AWS CDK, AWS SAM, Terraform

CI/CD Tools: GitHub Actions, Gitlab CI, Jenkins

Containerization & Orchestration: Docker, Kubernetes

CI/CD & GitOps: ArgoCD, Flux

Automation & Development: Airflow, FastAPI, FastMCP, LLM-based automation tools, Streamlit

Monitoring & Logging: CloudWatch, Datadog, New Relic, OpenSearch

Security & Management: AWS Inspector, AWS Private CA, Patch Manager
